Who Should Pursue SSM DBA?

The DBA is designed for accomplished professionals ready to elevate their expertise through rigorous research and earn the terminal degree in business. Whether you're advancing to the C-suite, building consulting credibility, or establishing academic authority, the DBA provides the research framework and recognized credential to amplify your impact.

Senior Managers

Ready to make board-level, evidence-based decisions and seeking executive advancement with research-backed authority. **Position:** Director, VP, C-Suite preparation.

Consultants & Entrepreneurs

Seeking research-backed credibility to win clients and scale smarter while building thought leadership and industry authority. **Position:** Independent consultants, business owners, strategy leads.

Functional Leaders

HR, Finance, Operations, and Marketing leaders aiming for enterprise-wide strategy roles. Elevate from functional management to strategic leadership. **Position:** Department heads, functional directors transitioning to enterprise roles.

Public/NGO Leaders

Must measure impact and inform policy with solid data while building evidence-based programs. **Position:** Public sector leaders, NGO directors, program managers.

Educators & Trainers

Need a terminal degree to teach, supervise, and publish while building academic credentials and research portfolio. **Position:** Academic faculty, training directors, educational leaders.

Transformation Leads

AI, ESG, and Digital transformation leads who must prove ROI with rigorous methods and build data-backed transformation strategies. **Position:** Chief Transformation Officers, Digital leads, Sustainability heads.

Program Suitability: For experienced professionals with significant career accomplishments who are ready to conduct original research and make organizational contributions. Ideal for leaders seeking the highest level of professional credential and those wanting to bridge the academic-practice gap.
